PROGRAMME SPECIFICATION

Name of Programme:		BSc (Hons.) in Business Management (without specialisation or with specialisation in AI and Data Analytics, Arts Management, Diplomacy and International Relations, HRM and Business Psychology, Marketing, or Tourism)	
Final award (BSc, MA etc):		BSc	
Awarding institution/body:	University of Buckingham & International Business School (separate degrees)	Teaching institution:	International Business School
School of Study:	School of Business	Parent Department: (the department responsible for the administration of the programme)	Collaborations
Length of the programme:	6 semesters	Method of study:	Full-time, face-to-face
Framework for Higher Education Qualifications (FHEQ) Level	FHEQ Level 6	Relevant subject benchmark statement (SBS)	Business and Management (2023)
Professional body accreditation (if applicable):	N/A		
Criteria for admission to the programme:	 Certificate of Secondary Education Non-native speakers: IELTS 6.0 or TOEFL 550 or TOEFL computerised 213 or a Pass mark in the Single English Test at IBS (SETI) examination 	Cohort(s) to which this programme specification is applicable:(e.g., from 2012 intake onwards)	From September 2024
UCAS Code	N/A		

Summary of Programme

The programme offers a comprehensive and interdisciplinary approach to preparing students for successful careers in the dynamic field of business. Through a combination of rigorous academic study, practical application, and specialized training, students gain a deep understanding of key business concepts, contemporary issues with optional specialization in Al and data analytics, arts management, diplomacy and international relations, HRM and business psychology, marketing, or tourism.

With a focus on developing critical thinking, leadership abilities, and ethical decision-making skills, the programme equips students with the knowledge and competencies needed to excel in diverse organizational settings. Practical training in resource management, technology utilization, communication, and leadership prepares students to address real-world challenges and seize opportunities in today's global business landscape.

By promoting social and cultural awareness, as well as technology responsibility, the programme fosters a holistic understanding of the business environment and encourages students to become ethical and socially responsible leaders capable of driving sustainable growth and positive change in organizations and society at large.

Educational Aims of the Programme

The specific aims of the programme are the following:

- To foster a deep understanding of key theoretical frameworks, concepts, and principles across various areas of business management, including
 marketing, finance, human resource management, operations, and strategic management. In addition, students choosing one of the specialisations will
 have the opportunity to acquire in-depth understanding of a particular area of business.
- To develop critical thinking skills to analyse contemporary issues, challenges, and trends affecting businesses in domestic and international contexts, while considering their ethical, social, and environmental implications.
- To cultivate leadership qualities, enhance self-awareness, and promote initiative among students, enabling them to navigate complex organizational dynamics and contribute effectively to shaping organizational culture, performance, and stakeholder relationships.
- To instill a commitment to sustainable business practices, corporate responsibility, and ethical decision-making, thereby enhancing organizational reputation, stakeholder trust, and long-term viability.
- To provide practical skills in resource management, technology utilization, communication, and leadership, empowering students to address real-world business challenges and opportunities with confidence and competence.
- To foster social and cultural awareness, encouraging respect for diversity, social justice issues, and the wider global context within which businesses
 operate.
- To promote technology awareness and responsible use of technology, ensuring students understand the impact of technology on societies and organizations while leveraging it effectively to drive innovation and growth.

Programme Outcomes		
 Knowledge and understanding of: At the end of the programme, students are expected to gain knowledge and understanding of: 1. Key theoretical frameworks, concepts, and principles in various areas of business management, including marketing, finance, human resource management, operations, and strategic management. 	Explain the teaching and learning methods and strategies used to help students achieve each part of the knowledge and understanding - The flipped classroom methodology will be widely used during the programme. This concept enables a problem-based approach in class, whereby students will have the opportunity to work on real-life scenarios and case studies, practice problem solving and critical	
 Contemporary issues, challenges, and trends affecting businesses in domestic and international contexts, considering their ethical, social, and environmental implications. The role of leadership, organizational behaviour, and corporate governance in shaping organizational culture, performance, and stakeholder relationships. 	 peer-review skills, along with teamwork and collaboration skills and techniques through a variety of classroom activities including individual and group tasks (discussions, simulations, role plays, presentations, organisation-based case studies, business outings, etc.). Virtual learning environments are utilized throughout the teaching and learning process. Presentations by invited experts and practising managers and field 	
4. The importance of sustainable business practices, corporate responsibility, and ethical decision-making in enhancing organizational reputation, stakeholder trust, and long-term viability.	visits will provide real world input. - Special sessions and individual consultation will be available for students for providing academic support as appropriate.	
The impact of digital technologies and data analytics on business operations and customer engagement.	Assessment Strategy: Explain the strategies used to assess the achievement of each part of the knowledge and understanding	

<u>Programn</u>	ne Outcomes

- [Specialisation in AI and Data Analytics] Advanced techniques in artificial intelligence and data analytics to extract actionable insights from datasets, inform strategic decision-making, and drive innovation across various business functions.
- 7. [Specialisation in Arts Management] The intersection of artistic expression and business practices to effectively manage organizations in the cultural sector.
- [Specialisation in Diplomacy and International Relations]
 The fundamental principles of foreign affairs, the structure and operation of different political and international systems, and the development of regions from a multi-disciplinary perspective.
- [Specialisation in HRM and Business Psychology]
 Psychological theories and methodologies to assess
 individual and organizational behaviour, design effective
 talent management strategies, foster employee
 engagement and well-being, and resolve interpersonal
 conflicts within diverse workplace environments.
- 10. [Specialisation in Marketing] Advanced marketing strategies and techniques to effectively analyse consumer behaviour, develop targeted marketing campaigns, and optimise brand positioning in diverse market segments, leveraging digital platforms and traditional marketing channels.
- 11. [Specialisation in Tourism] The socio-cultural, economic, and environmental contexts of tourism activities and sustainable tourism development strategies that balance economic growth with preservation of cultural heritage and natural resources.

- coursework (tests, case study analyses, posters, learning journals, portfolios, simulations, movie analyses, role plays and their analyses, individual and group assignments and presentations, continuous assessment tasks),
- formal examinations.

Programme Outcomes		
 Cognitive (thinking) skills: At the end of the programme students are expected to develop the following cognitive and intellectual skills: 1. Problem-solving. Determine the source of a problem and find an effective solution. 2. Initiative. Take on responsibilities and challenges. 3. Self-awareness. Assess their own values, passions, aspirations, fit with environment, reactions (including thoughts, feelings, behaviours, strengths and weaknesses), and impact on others, as well as understand how they are perceived by others in terms of those same factors. 4. Active learning and learning strategies. Understand the implications of new information for both current and future problem-solving and decision-making. 5. Reading, writing, and quantitative skills. Exhibit core literacies needed to work with and acquire more specific skills in a variety of different domains. 	→	 Teaching/Learning Strategy: Explain the teaching and learning methods and strategies used to help students achieve each part of the cognitive skills Integrated skills development modules. A series of skills development modules spread across the programme's six semesters. These modules systematically address various cognitive skills. Experiential learning opportunities. Experiential learning opportunities offered through case studies, simulations, projects, etc. These hands-on experiences enable students to apply cognitive skills in real-world contexts, fostering deeper understanding and skill development. Feedback and reflection mechanisms. Regular feedback and opportunities for reflection on students' cognitive skill development is provided. Feedback can come from instructors, peers, and self-assessment exercises, allowing students to identify areas for improvement and track their progress over time. Multimodal instructional approach. A multimodal instructional approach is employed that integrates diverse teaching methods, technologies, and resources. This approach caters to different learning styles and encourages active engagement, ensuring that students develop a holistic set of cognitive skills necessary for success in business and management.
	\rightarrow	Assessment Strategy: Explain the strategies used to assess the achievement of each part of the cognitive skills

Programme Outcomes		
	 Authentic performance tasks. Authentic performance tasks are employed that require students to apply cognitive skills in real-world contexts relevant to business and management. These assess students' ability to analyse complex scenarios, take initiative in proposing solutions, reflect on their own strengths and weaknesses, and adapt their learning approaches accordingly. Integrated assessments. Integrated assessments evaluate students' proficiency in multiple transferable skills. Student performance is assessed based on a combination of deliverables, teamwork dynamics, communication effectiveness, and adherence to ethical and cultural considerations. Portfolio-based assessment. Portfolio-based assessments require students to compile evidence of their transferable skill development across various activities and assignments. The depth and breadth of students' transferable skills demonstrated through portfolio artifacts are evaluated, providing feedback on strengths and areas for improvement. Peer and self-assessment exercises. Peer and self-assessment exercises are integrated into the assessment process to encourage reflection and collaboration. 	

Programme Outcomes		
Practical/Transferable skills (able to):		Teaching/Learning Strategy:
At the end of the programme students are expected to develop the following practical and transferable skills:		Explain the teaching and learning methods and strategies used to help students achieve each part of the practical/transferable skills
 Resource management and operations. Allocate resources efficiently and effectively, and manage activities that businesses engage in daily to gain value from physical or intangible assets. Digital literacy. Efficiently analyse and critically evaluate business data using appropriate digital technologies to underpin decision-making. Active listening, communication and information exchange. Pay attention to what others say and understand points being made, establish rapport, adjust the register, and respect the intervention of others. Service orientation. Actively look for ways to help others as well as make them feel attended to and welcome. Leadership and social influence. Have an impact on others 	\rightarrow	 Process approach to skills development. The programme takes a process approach to skills development, whereby students need to tackle small tasks in order to incrementally build the skills, with ample opportunity for formative feedback from peers and Seminar Leaders. Integrated skill development. Integrated skill development modules address multiple transferable skills simultaneously. By integrating skills, students can learn to apply them in interconnected real-world scenarios. Experiential learning activities. Experiential learning activities are implemented where students work alone or in teams to tackle more or less complex organizational challenges. Role-play and simulation exercises. These exercises simulate real-world business environments in which students take on different roles allowing them to a range of transferable skills.
 in the organization and display energy and leadership, regardless of their function within the organization. 6. Social cultural awareness. Respect and value others, and demonstrate awareness of the wider world, of history and of social justice issues. 	\rightarrow	Assessment Strategy: Explain the strategies used to assess the achievement of each part of the practical/transferable skills
